

Event producers are now delivering real-time, interactive experiences that connect audiences to the stage like never before.

With LiveSwitch's *Private Cloud*, event production teams can connect their equipment to high performance cloud infrastructure to produce bi-directional live events with remote audience members in a way that has previously only been achievable with complex high cost gear.

Sports Broadcasting & Performances

Recreate interactions normally found at sports arenas or live concert events using our sub-second latency video. Bring audience energy online and create spectacular shows.

Talk Shows, Game Shows & Comedy Clubs

Bring the atmosphere of a live studio audience online and engage with them in real-time. Delight audiences and give performers the feedback they crave.

- ✓ Sub-second broadcast latency with private cloud video infrastructure
- ✓ Integrate bi-directional live video from remote audience members with your own production studio equipment
- ✓ Developer-friendly API and SDKs to create your ideal audience experience

Private Cloud

A managed, dedicated infrastructure for successful event production delivery, from a team that's big enough to deliver and small enough to care.

- ✓ Isolated Workloads
- ✓ Dedicated Resource Pool
- ✓ Ultimate Reliability
- ✓ Guaranteed Availability

Ultimate Flexibility

Enjoy LiveSwitch's P2P/SFU/MCU hybrid video architecture and powerful API. Leverage its media pipeline access for the widest range of platforms - all with an impressive private cloud that gets the job done.

A-La-Carte Add-On Services

Available services provided by LiveSwitch Inc. to augment your Private Cloud that ensures the success of your event.
