

LiveSwitch Cloud

Massively flexible video, voice and messaging.

Break the boundaries of what's possible with video using LiveSwitch's unparalleled flexibility and massive scalability.

Trusted by amazing companies

Build exactly what you want.

Bring your ideas to life without compromising your vision. LiveSwitch's powerful APIs were designed with flexibility in mind so you are never limited by your video platform.

Fully managed cloud infrastructure

Our **Public Cloud** offers secure and reliable service with easy access to the LiveSwitch dashboard. For enhanced control over deployment and regional provisioning in more than 25 regions, we also offer **Private Cloud** services that include complete concierge service, so your team can focus on what matters most to you.

Complete control of your application

The LiveSwitch Cloud dashboard makes creating and configuring your applications, channels and webhooks easy. You can configure the application in the way that best suits your business logic without sacrificing functionality or control.

Unlimited scalability

Connect anyone, anywhere to rich and reliable video experiences. From small-scale conferences to **massive** live broadcasts, LiveSwitch scales to handle it all.

Deep insights with analytics and telemetry

LiveSwitch Cloud's powerful **analytics** and **telemetry** will help you to visualize how your application is performing in real-time. Whether you are looking for usage statistics or connection quality, our user-friendly telemetry dashboard makes it all possible.

Cross platform flexibility
